## Project Description

The event **WHERE IS BUCHAREST "LINEAS URBANAS"** is a video/art project and Surrealist experience. It is an extending video work that has already been presented three times in Bucharest, by Andreas Boden, together with DJ Vasile (and various other artists). The events 'U 01 o 01' and 'r 01' already took place in the past. Because I live and work in the city, I got the idea to interpret it through a video/art project. It is an urban sculpture presented by living beings (humans, dogs...), brick and concrete volumes

(buildings), as well as moving steel structures (cars). This original event shall allow us to understand the urban space of Bucharest in all its madness and allows us to bring a new reading on a fascinating underestimated city. To create this surrealist universe, precise scenic devices were used, between 'High Tech' and 'Low Tech.' The scene set up, allowed an effective play of projections, light and transparencies. A sculpture of the city's urbanism was the aim.
